

Hearing loss doesn't just impact the person whose hearing is diminished. Everyone who loves them and lives with them suffers from circumstances like TV on too loud, verbal misunderstandings or resorting to repeating one's self to "What?" "Huh?" "I beg your pardon?"

Untreated hearing loss will continue to be a problem and not go away. This book covers the emotional aspects of hearing loss, the effects of metabolic diseases on hearing and suggestions on how to encourage and support a loved one to seek professional help if they have a hearing problem. Rancho Santa Fe Audiology does not endorse this book or author. The material is strictly made available for informational purposes.
